Subject: TN-In-IN-CA-2010-2672

Dear Sir, Madam,

I have recently been graduated from the University of Mons (Belgium) in Business Administration. I would like to acquire some experience in any field of activity related to economics, even though I have focused my recent studies on Finance.

I wish to put at your service all my professional skills and personal competences. Having the will to open myself up to other cultures, I spent the first year of my master degree at the Polytechnic University of Valencia in Spain. Moreover, I did an internship at a brokerage insurance agency in Bogotá, Colombia. These experiences not only enabled me to strengthen my knowledge of Spanish and English, as they also demonstrated my ability to quickly adapt to a multicultural environment. Furthermore, I am a very sociable person and a good team player. In my opinion, establishing strong relationships is a must for both professional and personal development.

After having been involved in the commercial sector, I would like to make myself useful by working for a nonprofit organization where the human aspect is the central concern. This is the reason why I am very interested in joining your organization, and being a part of one of your projects would really appeal to me.

In brief, pending an interview to introduce myself, I herein attach my resume detailing my qualifications. If you require further information, I will be pleased to provide upon with any other additional data you may require. Looking forward to hearing from you soon.

Yours faithfully,

Fréché Bérenger
